The latter has already been done numerous times. There are email to fax and fax to email applications that have been available for decades. I'm pretty certain that converting email to fax into app or form submission to fax is pretty trivial. They convert faxes to PDF's in many of these apps IIRC so anywhere you could view a PDF you could get a fax. Filling out a prior authorization is not a requirement of our practice. Most of us do this to help our patients, and it is sometimes taken for granted.Think about it. It is your insurance company that is requesting us to fill out this form, taking time away from actually treating patients, to help you save money on your medications. We understand that, and usually do our best to take care of them, but unless we have a large practice, with someone actually paid to spend all their time doing these PA's, we have to carve out more time from our day to fill out paperwork.It's also possible, although not likely, that the pharmacy does not have the correct fax number, the faxes have been misplaced, the doctor has some emergencies and is running behind, went on vacation, and so on.Paperwork and insurance requests have become more and more burdensome on our practices, not due to anything on the part of our patients, but a major hassle none the less. I was selected for a summer internship 2016.1 tried to be very open while filling the preference form I choose many products as my favorite products and I said I'm open about the team I want to join.I even was very open in the location and start date to get host matching interviews(I negotiated the start date in the interview until both me and my host were happy.) You could ask your recruiter to review your form (there are very cool and could help you a lot since they have a bigger experience).Do a search on the potential team.Before the interviews, try to find smart question that you are going to ask for the potential host (do a search on the team to find nice and deep questions to impress your host). Prepare well your resume.You are very likely not going to get algorithm/data structure questions like in the first round. It's going to be just some friendly chat if you are lucky. If your potential team is working on something like machine learning, expect that they are going to ask you questions about machine learning, courses related to machine learning you have and relevant experience (projects, internship). Of course you have to study that before the interview. Take as long time as you need if you feel rusty. It takes some time to get ready for the host matching (it's less than the technical interview) but it's worth it of course. Just register on the admission portal and during registration you will get an option for the entrance based course. Just register there. There is no separate form for DU CIC.
